Investment Policy and Strategy

The Fund seeks to achieve its objective by investing a minimum of 70% of its NAV in RM-denominated fixed income securities such as RM-denominated fixed income securities issued by corporate entities or financial institutions and/or issued or guaranteed by the Malaysian government, Bank Negara Malaysia, government-related entities and/or quasi-government related entities. The Fund may invest in RM-denominated fixed income securities that are listed, unlisted, rated, unrated, convertible, perpetual or callable fixed income securities. In respect of convertible fixed income securities which the Fund invests in, we may dispose of such convertible fixed income securities prior to conversion. In the event we convert the convertible fixed income securities, we will dispose such convertible fixed income securities within 3 months from the date of conversion.

The Fund's investment maturity profile is subject to active maturity structure management based on the interest rate outlook without any portfolio maturity limitation. The Fund may invest in fixed income securities with varying maturities.

Our trading strategy is based on fundamental research rather than frequent trading. We will switch our security if we have a change in duration, sector, or credit outlook of the security. Credit quality, value and yield-spread are considered collectively.

We will also invest in RM-denominated fixed income securities or its issuers which have a minimum credit rating of at least AA3 or P2 by RAM Rating Services Berhad ("RAM") (or equivalent rating by Malaysian Rating Corporation Berhad ("MARC") or by any other reputable credit rating agency) at the point of purchase. In the event of a credit downgrade, we reserve the right to deal with the instrument in the best interest of Unit Holder. For example, we can continue to hold the downgraded instrument if the immediate disposal of such instrument would not be in the best interest of Unit Holder.

If the RM-denominated fixed income securities which the Fund intends to invest in or its issuers are unrated, we may only invest in those RM-denominated fixed income securities or issuers which have been approved by our internal

PRODUCT HIGHLIGHTS SHEET

credit committee.

The Fund may invest up to 30% of its NAV in Other RM-denominated Instruments.

Investments in structured products and derivatives

The Fund may invest up to 15% of its NAV in structured products issued by a single counter-party in fixed income related structured products such as, but not limited to, credit linked notes and bond linked notes. Investment into these structured products will provide the Fund with exposure to the reference asset. Each of these structured products has its own targeted maturity and will expose investors to the price fluctuations of the reference asset that the structured product is linked to. Any fluctuation in the price of the structured product may also lead to fluctuations in the NAV of the Fund i.e. if the price of the structured product drops, the NAV of the Fund will also be negatively impacted. As the Fund may invest up to 15% of its NAV in structured products, investors should be aware that there is a likelihood for the NAV per Unit to experience high volatility.

As the structured product is structured by an external party, investments into a structured product will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on its counterparty prior to an investment being made.

Derivative trades may be carried out for hedging purposes only through financial instruments including, but not limited to, interest rate swaps, forward contracts and futures contracts.

Asset Allocation	Asset Class	% of Fund's NAV
	RM-denominated fixed income securities.	A minimum of 70%
	Other RM-denominated Instruments.	Up to 30%
Distribution Policy	The Fund intends to distribute income, if any, at least once a year. However, we reserve the right not to distribute at our absolute discretion if it is not in the best interest of the Unit Holders. The Fund may distribute from realised income, realised gains and/or capital.	
Minimum Initial Investment[^]	RM 1,000.	
Minimum Additional Investment[^]	RM 100.	
Minimum Holdings to Maintain an Account[^]	1,000 Units.	

[^]or such other lower amount as may be determined by us from time to time

KEY RISKS

Specific Risks

- Credit and default risk**
 Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income security. In the case of rated fixed income security, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the Fund.
- Interest rate risk**
 Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities. When interest rates rise, fixed income securities prices generally decline, and this may lower the market value of the Fund's investment in fixed income securities and affect the NAV of the Fund negatively. The reverse may apply when interest rates fall.
- Counterparty risk**
 Counterparty risk is the risk to each party of a contract (such as over-the-counter derivatives, repurchase agreements, futures and forward contracts, etc.) that the counterparty will fail to perform its contractual obligations and/or to respect its commitments under the term of such contract, whether due to insolvency, bankruptcy or other cause. In this regard, the Fund may be exposed to risks arising from the solvency of its counterparties and from its inability to respect the conditions of the contracts.
- Liquidity risk**
 Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
 This risk may also arise during periods of unexpected high repurchase requests by Unit Holders. We may be forced

PRODUCT HIGHLIGHTS SHEET

to withdraw the Fund's assets prior to their maturity. Such premature withdrawal will have an impact on the Fund's NAV per Unit and in turn, your investments through the risk of reduced returns and in some cases loss of capital invested in the Fund.

- **Derivative risk**

We may use derivatives for hedging purposes only. Valuation of derivatives takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV. When participating in derivatives, we will monitor the valuation of the derivatives and credit ratings of the financial institutions as counterparty to the instruments, where applicable and take appropriate actions to mitigate any risk associated with such instruments. This may extend to unwinding of the derivatives in the event where there is a need to terminate current position due to reversal in market movement, repurchases in Units or upon downgrade of the credit ratings of the financial institutions.

- **Structured products risk**

The NAV of the Fund will be impacted by the valuation of the structured products. Factors that may impact the valuation of the structured products will include, but not be limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the structured products hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the structured products that the Fund invested in.

- **Unrated fixed income securities risk**

Unrated fixed income securities or money market instruments can be less liquid than rated fixed income securities or money market instruments. Many of the unrated fixed income securities or money market instruments are traded over the counter and/or do not trade frequently compared to rated fixed income securities or money market instruments. When the unrated fixed income securities or money market instruments do trade, their prices may be significantly higher or lower than expected. At times, it may be difficult to sell unrated fixed income securities or money market instruments promptly at an acceptable price, which may limit the Fund's ability to sell these instruments in response to specific economic events.

Unrated fixed income securities or money market instruments may pay higher profit rate than rated fixed income securities or money market instruments of comparable quality. As a result, unrated fixed income securities or money market instruments are subject to greater risk of illiquidity or sudden price changes. Public information on unrated fixed income securities or money market instruments or their issuers is typically less available as compared with rated fixed income securities or money market instruments.

- **Deferment/suspension of repurchase risk**

For the purpose of managing the liquidity of the Fund, the Fund may defer the repurchase of Units to the next Business Day if the total net repurchases received by us is more than 10% of the NAV of the Fund on a particular Business Day. When such repurchase limit is triggered, it may affect the Fund's ability to meet Unit Holders' repurchase request and may lead to a delay in repayment of repurchase proceeds to the Unit Holders.

The Manager may, in consultation with the Trustee and having considered the interests of Unit Holders, suspend the dealings in Units of the Fund due to exceptional circumstances, for example, when the market value or fair value of a material portion of the Fund's assets cannot be determined. In such event, Unit Holders will not be able to repurchase their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

- **Capital distribution risk**

The Fund may distribute income out of its capital. The declaration and payment of distribution may have the effect of lowering the NAV of the Fund. In addition, distribution out of the Fund's capital may reduce part of the Unit Holders' original investment and/or capital gains attributable to the original investments and may also result in reduced future returns to Unit Holders.

PRODUCT HIGHLIGHTS SHEET

It is important to note that an investment in the Fund carries risks and the above list of risks may not be exhaustive. While every care will be taken by us to mitigate the risk, you are advised that it is not always possible to protect investments against all risks.

You are recommended to read the whole Prospectus to assess the risks of the Fund and if necessary, you should consult your advisers, e.g. their bankers, lawyers, tax advisers or independent investment advisers for a better understanding of the risks.

For more details, please refer to section 4.1 and section 4.2 in the Prospectus for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed for the Fund and as a result, your rights as an investor may be limited. Accordingly, we will only recognise the Distributor as a Unit Holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed for the Fund.

For the period under review i.e. 1st July 2023 to 30th June 2024, the Fund registered a return of 4.54%, which outperformed the benchmark return of 2.73%.

(c) Basis of calculation and assumption made in calculating the returns

Capital return = (End NAV per Unit / Beginning NAV per Unit) – 1

Income return = Income distribution per Unit / NAV per Unit ex-date

Total return = (1+Capital return) x (1+Income return) – 1

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.
