PRODUCT HIGHLIGHTS SHEET

This Product Highlights Sheet only highlights the key features and risks of the Opus Dynamic Fund. Investors are advised to request, read and understand the Prospectus and its supplementary(ies) (if any) before deciding to invest.

OPUS DYNAMIC FUND

BRIEF INFORMATION OF THE PRODUCT

Launch date	5 May 2026
Name of Issuer	Opus Asset Management Sdn Bhd.
Benchmark	Target return of 8% per annum. As the Fund holds a tactical asset allocation strategy which enables us to invest into equities, equity-related securities and/or fixed income securities, there is no direct benchmark to reflect the investment strategy of the Fund. <i>Notes:</i> <i>(1) This is not a guaranteed return and is used as a yardstick to measure the Fund's performance. The Fund may or may not achieve 8% per annum but targets to achieve this growth over the long term.</i> <i>(2) Please note that the risk profile of the Fund may be higher than the risk profile of the benchmark.</i>
Investment Objective	The Fund aims to seek long term capital appreciation. <i>Any material change to the investment objective of the Fund will require Unit Holders' approval.</i>
Financial Year	31 March.
Capital Guarantee	The Fund is neither a capital guaranteed fund nor a capital protected fund.

PRODUCT SUITABILITY

Fund Type	Growth.
Fund Category	Mixed Assets.
Investors' Profile	The Fund is suitable for investors who: <ul style="list-style-type: none"> • seek potential long term capital appreciation; • have a long term investment horizon; • have high risk tolerance; and • are comfortable with the greater volatility and risks of investing in one or multiple asset classes at any one point in time.

KEY PRODUCT FEATURES

Initial Offer Price	Classes of Units		Initial Offer Price	
	Class A		RM 1.00	
	Class B		RM 1.00	
Initial Offer Period	Fourteen (14) days from the date of the Prospectus (inclusive). The Initial Offer Period may be shortened if we determine that it is in your best interest.			
Investment Manager (the Manager)	Opus Asset Management Sdn Bhd.			
Trustee	SCBMB Trustee Berhad.			
Trustee's Delegate	Standard Chartered Bank Malaysia Berhad.			
Auditor	PricewaterhouseCoopers PLT.			
Tax Adviser	PricewaterhouseCoopers Taxation Services Sdn Bhd.			

Investment Policy and Strategy
The Fund seeks to achieve its investment objective by investing in a balanced mix between equities, equity-related securities and fixed income securities (e.g. sovereign, quasi-sovereign and corporate bonds) each of which either listed or unlisted. Under normal circumstances, the Fund will allocate its assets among various regions and countries in the global markets. The Fund may invest in these asset classes via direct investment and/or CIS. The Fund may also invest in CIS which are real estate investment trusts and exchange-traded funds (which may include commodity ETF and physically-backed metal ETF) when opportunities arise. We will evaluate the suitability of the CIS by reviewing its track record, investment objective, investment strategy and fund performance when selecting the CIS.

We combine a top-down asset allocation process with a bottom-up security (e.g. equities, equity-related securities and fixed income securities) selection process. The asset allocation will be reviewed periodically depending on factors such as macroeconomic and respective country's economic outlook. We employ an active asset allocation strategy depending upon the equity market expectations. We may tactically shift the Fund's allocation across any country and/or region to take advantage of changing market conditions for potential capital appreciation and in response to changing market conditions such as a change in government policy that may potentially improve a country's or region's economic condition. We may, at our discretion, invest a significant portion of the Fund's NAV (i.e. up to 98% of the Fund's NAV) in a few regions (i.e. in at least two regions). We will also employ an active trading strategy in managing the Fund. However, the frequency of our trading strategy will vary depending on market opportunities.

The Fund may invest in local fixed income securities with a minimum credit rating of at least A3 or P2 by RAM (or equivalent rating by MARC or by any other reputable credit rating agency), at the time of purchase. The Fund may also invest in unrated fixed income securities if we believe that these unrated fixed income securities are comparable in investment quality to fixed income securities that

PRODUCT HIGHLIGHTS SHEET

are rated. In the event of a credit downgrade, we reserve the right to deal with the fixed income securities in the best interest of Unit Holder. For example, we may continue to hold the downgraded fixed income securities if the immediate disposal of such fixed income securities would not be in the best interest of the Unit Holders. If the fixed income securities which the Fund intends to invest in or its issuers are unrated, we may only invest in those fixed income securities or issuers which have been approved by our internal credit committee. There will be no minimum credit rating for foreign fixed income securities.

Investments in derivatives and embedded derivatives

We may hedge the currency risk arising from fluctuations in exchange rates between the base currency of the Fund and the currencies of its investments through the use of financial derivative instruments including, but not limited to, cross currency interest rate swaps, foreign exchange forward contracts, currency options and futures.

The Fund may invest up to 30% of its NAV in embedded derivatives such as fixed income related structured products which include but are not limited to, credit linked notes and bond linked notes. Investment into these embedded derivatives is undertaken to enable the Fund to obtain exposure to the reference asset. Each of these embedded derivatives has its own targeted maturity and will expose investors to the price fluctuations of the reference asset that the embedded derivative is linked to. Any fluctuation in the price of the embedded derivative may also lead to fluctuations in the NAV of the Fund i.e. if the price of the embedded derivative drops, the NAV of the Fund will also be negatively impacted. As the Fund may invest in embedded derivatives, investors should be aware that there is a likelihood for the NAV per Unit to experience high volatility. As the embedded derivatives is structured by an external counterparty, investments into embedded derivatives will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on its counterparty prior to an investment being made.

Temporary Defensive Position

We may take temporary defensive positions that may be inconsistent with the Fund's investment strategy in attempting to respond to certain circumstances including but not limited to adverse market, economic and political conditions, insufficient funds to form an efficient portfolio, periods of high repurchases or any other adverse conditions. In such circumstances, the Fund may temporarily hold up to 100% of the Fund's assets in money market instrument and/or deposits as a defensive strategy to preserve the NAV of the Fund.

Asset Allocation

- 20% to 100% of its NAV in equities or equity-related securities (including units/shares of CIS investing in equities and units/shares of exchange-traded funds);
- 0% to 70% of its NAV in fixed income securities (including units/shares of CIS investing in fixed income securities, money market instruments and/or deposits); and
- 0% to 30% of its NAV in embedded derivatives.

Distribution Policy

Class of Units	Distribution Policy
Class A	This Class intends to distribute income, if any, at least once a year.
Class B	This Class is not expected to make any distribution.

Applicable to Class A only

However, we reserve the right not to distribute at our absolute discretion if it is not in the best interests of the Unit Holders.

The Fund may distribute from realised income, realised gains and/or capital. The rationale for distributing out of the Fund's capital is to allow the Fund the flexibility to (i) declare distribution, in circumstances where the Fund has unrealised gains and/or unrealised income by virtue of the Fund's performance, to the Unit Holders without having to dispose the underlying assets of the Fund whilst allowing the value of the Fund's assets to appreciate further in the future, or (ii) increase the amount of distributable income to the Unit Holders, after taking into consideration the risk of distributing out of capital. Any distribution, including distributions out of capital, will only be made after taking into consideration, among others, the Fund's realised gains, realised income, cash flow position and overall portfolio performance. We will ensure that any distribution made is consistent with the Fund's investment strategy and does not adversely impact the Fund's ability to achieve its investment objective over the long term.

Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the Unit Holders' original investment and may also result in reduced future returns to the Unit Holders. When a substantial amount of the original investment is being returned to the Unit Holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.

PRODUCT HIGHLIGHTS SHEET

[^] or such other lower amount as may be determined by us from time to time

KEY RISKS

Specific Risks

- **Stock specific risk**

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

- **Risk associated with investments in equity-related securities**

The Fund may also invest in equity-related securities such as warrants that are capable of being converted into shares. As warrants are linked to the particular equity securities from which they are derived, the warrants inherit the risks linked to that underlying equity security such as market risk, currency risk, industry risk and liquidity risk. For investments in warrants, a movement in the prices of the underlying securities of the warrants will generally result in a larger movement in the prices of the warrants, that is, higher volatility. In the event of a decline in the market, warrants can lose a substantial amount of their values, far more than the underlying securities and vice versa. Warrants also have a limited life and if they are not exercised at the maturity, they will expire and become worthless causing the value of the Fund's investments to fall. Like any other investments, the fall in the value of the Fund's investments will ultimately lower the NAV.

- **Capital Distribution Risk**

The Fund may distribute income out of its capital for Class A. The declaration and payment of distribution may have the effect of lowering the NAV of the Class. In addition, distribution out of the Fund's capital may reduce part of the Unit Holders' original investment and/or capital gains attributable to the original investments and may also result in reduced future returns to Unit Holders.

- **Credit and default risk**

Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income securities. In the case of rated fixed income security, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the Fund.

- **Interest rate risk**

Interest rate risk refers to the impact of interest rate changes on the valuation of the fixed income securities and money market instruments. When interest rate rise, the pricing of the fixed income securities and money market instruments prices may decline and lower the market value of the Fund's investment in fixed income securities and money market instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, we will manage the fixed income securities and money market instruments taking into account the interest rate and time to maturity of the fixed income securities and money market instruments.

- **Liquidity risk**

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

This risk may also arise during periods of unexpected high repurchase requests by Unit Holders. We may be forced to withdraw the Fund's assets prior to their maturity. Such premature withdrawal will have an impact on the Fund's NAV per Unit and in turn, your investments through the risk of reduced returns and in some cases loss of capital invested in the Fund.

- **Currency risk**

As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated in depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

- **Concentration risk**

There is a risk that the Fund's investments may be overly concentrated in a few regions. As such, developments affecting any of these few regions may have a more adverse impact on the NAV of the Fund as compared to the scenario where the Fund is more diversified across many regions.

- **Regulatory and legal risk**

The investments of the Fund would be exposed to changes in the laws and regulations in the countries the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, we seek to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. We may dispose the Fund's investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.

- **Counterparty risk**

Counterparty risk is the risk to each party of a contract that the counterparty will fail to perform its contractual obligations and/or to respect its commitments under the term of such contract, whether due to insolvency, bankruptcy or other cause. In this regard, the

PRODUCT HIGHLIGHTS SHEET

Fund may be exposed to risks arising from the solvency of its counterparties and from its inability to respect the conditions of the contracts.

- **Derivative risk**

We may use derivatives for hedging purposes only. Valuation of derivatives takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV. When participating in derivatives, we will monitor the valuation of the derivatives and credit ratings of the financial institutions as counterparty to the instruments, where applicable, and take appropriate actions to mitigate any risk associated with such instruments. This may extend to unwinding of the derivatives in the event where there is a need to terminate current position due to reversal in market movement, repurchases in Units or upon downgrade of the credit ratings of the financial institutions.

- **Embedded derivatives risk**

The Fund may invest in embedded derivatives such as fixed income related structured products which include but are not limited to, credit linked notes and bond linked notes. Factors that may impact the valuation of the embedded derivatives include, but are not limited to, movement of the underlying assets, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and such other factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the embedded derivatives; hence, impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the embedded derivatives that the Fund invested in.

- **Country risk**

Investments of the Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund to fall.

- **Deferment/suspension of repurchase risk**

For the purpose of managing the liquidity of the Fund, the Fund may defer the repurchase of Units to the next Business Day if the total net repurchases received by us is more than 10% of the NAV of the Fund on a particular Business Day. When such repurchase limit is triggered, it may affect the Fund's ability to meet Unit Holders' repurchase request and may lead to a delay in repayment of repurchase proceeds to the Unit Holders.

The Manager may, in consultation with the Trustee and having considered the interests of Unit Holders, suspend the dealings in Units of the Fund due to exceptional circumstances, for example, when the market value or fair value of a material portion of the Fund's assets cannot be determined. In such event, Unit Holders will not be able to repurchase their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

- **Risk associated with investing in CIS**

Since the Fund may invest into CIS, investors should be aware that the CIS's management company has absolute discretion over the CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the CIS and/or the management company, the NAV of the Fund, which invests into those CIS would be affected negatively.

- **Cyber security risk (for Class B only)**

This is the risk arising from cyber-attack on e-service provider's mobile application or e-platform. Should the e-service provider's mobile application or e-platform be compromised, it may result in unauthorised transactions pertaining to the Fund. Further to that, your investment-related information and personal data may be leaked. All transactions through the e-service provider's mobile application or e-platform and/or the Fund may be temporarily suspended, in which you may not be able to transact through the e-service provider's mobile application or e-platform or in the Fund due to the cyber-attack.

- **Functionality risk (for Class B only)**

This is the risk that the e-service provider's mobile application or e-platform does not operate as intended due to factors including but not limited to connectivity and interface issues. If the e-service provider's mobile application or e-platform does not function as expected, your transaction through the e-service provider's mobile application or e-platform may not be correctly processed and/or completed.

- **Risk associated with discontinuation risk on the e-service provider's mobile application or e-platform (for Class B only)**

As all the transactions are done through the mobile application or e-platform developed by the e-service provider, the continuous operation of the e-service provider is crucial. The discontinuation of services provided by the e-service provider may be due to but not limited to revocation of its license. Should such event happen, repurchase from the Fund may be delayed.

It is important to note that an investment in the Fund carries risks and the above list of risks may not be exhaustive. While every care will be taken by us to mitigate the risk, you are advised that it is not always possible to protect investments against all risks.

You are recommended to read the whole Prospectus to assess the risks of the Fund and if necessary, you should consult your advisers, e.g. bankers, lawyers, tax advisers or independent investment advisers for a better understanding of the risks. For

PRODUCT HIGHLIGHTS SHEET

more details, please refer to section 4.1 and section 4.2 in the Prospectus for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser (“Distributor”) which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed for the Fund and as a result, your rights as an investor may be limited. Accordingly, we will only recognise the Distributor as a Unit Holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed for the Fund.

FEES AND CHARGES

Sales Charge	Up to 3.00% of NAV per Unit.					
Repurchase Charge	Nil.					
Annual Management Fee	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th style="width: 30%;">Class of Units</th> <th>Management Fee</th> </tr> <tr> <td>Class A</td> <td rowspan="2">Up to 1.50% per annum of the NAV of the Class</td> </tr> <tr> <td>Class B</td> </tr> </table>	Class of Units	Management Fee	Class A	Up to 1.50% per annum of the NAV of the Class	Class B

APPENDIX: GLOSSARY OF TERMS

"Business Day"	means a day (excluding Saturdays, Sundays and public holidays in Malaysia) on which banks in Kuala Lumpur are open for business and a day on which the stock exchange managed and operated by Bursa Malaysia Securities Berhad is open for trading.
"CIS"	means collective investment scheme(s).
"Class(es)"	means any class of Units in the Fund representing similar interest in the assets of the Fund although a class of Units of the Fund may have different features from another class of Units of the Fund.
"Class A"	means a Class which is offered to investors who do not fall under Class B.
"Class B"	means a Class which is offered to investors who invests through the mobile application or e-platform of e-service providers.
"e-service provider"	means: (a) a registered person under the Capital Markets and Services Act 2007 who operates an e-services platform for buying and selling of unit trust scheme; and (b) an e-services platform operator under the Guidelines on Recognised Markets who operates an e-platform which arranges or facilitate the sale, purchase or subscription of a capital market product offered by a Capital Markets Services License holder, to investors.
"ETF"	means exchange-traded fund(s).
"Fund"	means the Opus Dynamic Fund.
"Launch Date"	means the date of the first prospectus of the Fund and is the date on which sale of Units of the Fund may first be made; the Launch Date is also the date of constitution of the Fund.
"long term"	means a period of more than 5 years.
"Manager" or "us" or "we" or "our"	refers to Opus Asset Management Sdn Bhd.
"MARC"	means Malaysian Rating Corporation Berhad.
"NAV"	means the value of all the assets of the Fund less the value of all the liabilities of that Fund at a valuation point; where the Fund has more than one (1) Class, there shall be a NAV of the Fund attributable to each Class.
"NAV per Unit"	means the NAV of the Class at a particular valuation point divided by the number of Units in circulation of that Class at the same valuation point.
"Prospectus"	means the document which is registered with the Securities Commission Malaysia in relation to the Fund.
"RAM"	means RAM Rating Services Berhad.
"RM"	means Ringgit Malaysia, the official currency of Malaysia.
"Unit(s)"	means a measurement of the right or interest of a Unit Holder in the Fund and means a unit of the Fund or a Class, as the case may be.
"Unit Holder" or "you"	means a registered holder of a Unit or Units of a Class including any jointholder whose name appears in our register of Unit Holders; in relation to the Fund means all the Unit Holders of every Class in the Fund.
