MANAGER'S COMMENTARY:

With global growth expected to be severely impacted by the Covid-19 pandemic, we expect Malaysia's GDP growth for 2020 to slow further to 0% - 2%. Hence, we are expecting at least another 50bps cut in the OPR and will not be surprise if move comes before the next Monetary Policy Meeting in May. While we believe that interest rates will continue to be low for longer, we expect that there will be continued volatility in the short term as we may see further foreign outflows. However, we expect the bond market to reflect the economic fundamental of lower growth in the longer term. We believe that the local institutions have sufficient liquidity to absorb any foreign selling as well as the higher MGS supply in the market, which is evidenced by the strong demand from each government bond tenders with bid-to-cover averaging 2.45x so far this year. Hence, we see opportunities to buy when there is foreign selling. Our strategy is to maintain a high-level of liquidity by holding more cash and liquid bonds such as government, government-guaranteed and AAA-rated bonds. At the same time, we may sell corporate bonds if we feel that the credit spreads are too tight and also to reduce credit risk. Meanwhile, we will maintain our duration between 5 to 6 years.
