**MANAGER'S COMMENT:**

We continue to observe the extent of tariffs effects to translate into growth cut. We expect the easing cycle to continue globally as government brace for slower economic growth. We pay close attention for any downside risk to growth and any upward inflation pressure. On the local front, we expect the Malaysia bond market to be supported by the resilient economy, improving fiscal position, and strong demand from local institutions.

As such, we aim to lengthen our duration range to 5 - 7 years with focus on corporate credits while taking opportunity to trade on the long government bonds.
